## Dual Output Linear DC Power Supplies

Product No : TP600W\_2CH\_Series

### Product Description

The TP600W series are linear DC power supplies with 2 channels, 600W output. In constant voltage and current operations, the power supply provides high regulation and low ripple & noise. Auto series and parallel operations double output voltage and current. Automatic cooling fan control give sufficient cooling to the power supply and minimize fan noise. The output ON/OFF control and preset voltage & current function protect the power supply and related loads from unexpected damages. The TP600W series are widely used in applications of powering operational amplifier, push pull stages, logic circuit and definition systems.

- ★ Two independent adjustable outputs 0~30V/0~10A ×2 (TP-30102), 0~60V/0~5A ×2 (TP-60052)
- ★ Constant voltage and constant current operations
- ★ Low ripple and noise, low temperature drift
- ★ Auto Series and Parallel tracking operations
- ★ Output ON/OFF control
- ★ Preset voltage and current
- ★ High efficiency, high power density
- ★ Over load and reverse polarity protections
- ★ Dual-color four digital panel meters
